providing controlled heat treatment that removes, on average, 30-35% of the stratum corneum layer of dead skin cells. The combination of abrasion and aspiration stimulates the production of fibroblasts and cellular renewal to leave skin plumper and firmer. The machine offers multi-technology and a future-proof concept through an intelligent core unit with four possible treatment modes. Contact Thalgo 02 9477 6900 www.thalgo.com.au
